

Andrey Pautov

CTI-to-detection practitioner. Threat Intelligence Research Engineer.

Tel Aviv, Israel · +972-542-553-383 · 1200km@gmail.com · 1200km.com · linkedin.com/in/andrey-pautov · github.com/anpa1200 · medium.com/@1200km

PROFESSIONAL SUMMARY

CTI-to-detection analyst across government cyber defence (Israel Police Cyber Defence Unit) and commercial security engineering (XPLG). Profiles adversary infrastructure, reconstructs kill chains, and maps TTPs to ATT&CK-aligned detection candidates. Strong offensive security background grounded in real operational environments — 7 years in a special reconnaissance unit (Israel Ministry of Public Security, 2016–2023) and 2 years leading red-team operations against national law-enforcement infrastructure. Adversary behavior understood from the inside out. Published 150+ articles and 8 field guides on CTI tradecraft, detection engineering, and cloud security.

PROFESSIONAL EXPERIENCE

Threat Intelligence Research Engineer — XPLG May 2025 – Present · Tel Aviv

- Maps Iran-nexus and hacktivist TTPs to XPLG telemetry fields; produces Sigma-compatible detection use cases for endpoint, network, and cloud audit log sources.
- Translates CTI assessments into hunting hypotheses, detection content, and analyst investigation guides for enterprise SIEM/XDR deployment contexts.

Head of Red Team — Israel Police Cyber Defence Unit Jul 2023 – May 2025 · Jerusalem

- Directed red-team assessments against national law-enforcement infrastructure; converted offensive findings into detection hypotheses, telemetry coverage gap analysis, and IR runbooks.
- Produced adversary behavior research and hands-on lab environments used by blue team and SOC for detection development and threat hunting training.

Operator — Special Reconnaissance and AntiTerror Unit 2016 – 2023 · Israel

- Served 7 years as operator and fighter-paramedic in a special reconnaissance unit conducting field operations in high-threat environments.
- Developed deep understanding of adversary tactics, operational security, and mission planning under real-world conditions.

Independent Cybersecurity Researcher & Technical Author Oct 2024 – Present · Remote

- Published 150+ articles on CTI tradecraft, detection engineering, malware analysis, and cloud security; shipped 10+ open-source security tools on GitHub.
- Maintains 8 Docusaurus knowledge bases: CTI Analyst Field Manual, Israel Gov Threat Actors CTI, Customer-Driven AI CTI Project, OpenCTI Intelligent Shield.

SKILLS

CTI Tradecraft	ATT&CK Navigator · passive DNS · OSINT pivoting · confidence tiering · PIR/SIR · kill chain reconstruction · attribution methodology · Shodan · Censys · crt.sh · MITRE D3FEND
Detection Engineering	Sigma · YARA · hunting hypothesis development · telemetry field mapping · detection backlog · SIEM / XDR rule logic · log-based use case design
Malware Analysis	Capstone · FLIRT · Frida · INetSim · LIEF · static PE/ELF/APK analysis · CFG extraction · behavioral pattern detection · import table triage
Cloud Security	AWS CloudTrail · GCP Audit Log · Kubernetes threat modeling · ECS Fargate · Cloud Run · Terraform · attack simulation · container attack paths
Offensive Security	Deep knowledge — red-team operations · reconnaissance · vulnerability chaining · privilege escalation · lateral movement · adversary simulation · attack-path validation
Platforms & Languages	OpenCTI · STIX 2.1 · MISP · NVD API · CISA KEV · EPSS · Python · Bash · C/C++ · PowerShell · Linux

EDUCATION & BACKGROUND

120+ professional certifications across threat intelligence, detection engineering, malware analysis, cloud security, and offensive security. ICU Paramedic — Magen David Adom (2011–2016). **Languages:** Russian — native · Hebrew — bilingual · English — professional working proficiency.
